Plugin Features:

Support for 7-ELEVEN Standard and Micropayments Fee Schedules.

One single license "7-ELEVEN for WooCommerce" cover to use of both plugins: Standard and Micropayments.

A limit for the Micropayment (Total order price) can be set. Under or equal to this limit, 7-ELEVEN Micropayments will be available at checkout, and above this limit 7-ELEVEN Micropayments will be hidden, and up-to 5 other payment gateways can be defined to be hidden at checkout when Total order price is under or equal the defined limit.

On The Fly Order Status Update

With this plugin, you have an 7-ELEVEN Notification Parser, meaning when 7-ELEVEN Gateway receive a payment, it's automatically send an back-end server-to-server communication to your 7-ELEVEN - WooCommerce postback URL and this plugin automatically update orders status on the fly within WooCommerce.

Daily Synchronization of Order Status

Daily Synchronization of order status is done automatically with your 7-CONNECT Account.

This is an additional method to the above on the fly order status update.

This is particularly helpful in case some notifications were not received at WooCommerce as short Internet connection interruptions are possible, and having missing update status on orders in your WooCommerce was not an option. Also because 7-CONNECT do not send notify when transaction EXPIRED, so this daily synchronization is helpful to Cancel woocommerce order associated with a 7-CONNECT EXPIRED transaction.

Test Mode

Allow you to use your 7-ELEVEN test account and start testing orders and payments without real money transaction by selecting the "Bogus Bank Online" (with any id and password) or the "Bogus Bank Over-the-Counter".

Debug Log Mode

Option to use the plugin in debug mode for Log 7-ELEVEN events, such as Transaction Initiated, Web Redirection, Notification, Daily Txns Synchronization.

Compatibility with Plugin: Custom / Sequential Order Numbers for WooCommerce (<http://gremlin.io/shop/woocommerce-plugins/custom-sequential-order-numbers-woocommerce>)

- Set your own custom prefix for your orders – make your order numbers friendlier and unique to your store
- Set the length of your order numbers
- Set an increment value, so nobody can guess your real sales volume
- With the increment value, your order numbers will be sequentially increased

- Super easy installation and configuration
- Note: This plugin does not change any existing order numbers.

Prerequisites to use the plugin:

- 7-CONNECT merchant account (contact them in direct): <http://7-connect.philseven.com/merchants/> (<http://7-connect.philseven.com/merchants/>)
- Your own WordPress & WooCommerce installation
