Setup Guide | 7-ELEVEN for WooCommerce

- 1 - Compatibility and ChangeLog
- 2 - Download Plugin
- 3 - Unzip Plugin
- 4 - Upload Extracted Folder
- 5 - Activate Plugin
- 6 - WooCommerce | Settings | General
- 7 - WooCommerce | Checkout | Checkout Options
- 8 - WooCommerce | Checkout | 7-ELEVEN
- 9 - 7-CONNECT "Test Plan"
- 10 - Grid of Cross-Reference Status

1 - Compatibility and ChangeLog

- Can be found in their respective tabs at: <https://sishop.ph/7-eleven-plugin-for-woocommerce>
(<https://sishop.ph/7-eleven-plugin-for-woocommerce>)

2 - Download Plugin

- Require active account & license at SiteShop.ph
- Login here: <https://sishop.ph/member/login> (<https://sishop.ph/member/login>)
- Click on top menu "Downloads"

- Go to: 7-ELEVEN >> WooCommerce >> Stable
- Download the **Latest** Plugin version on your computer.
- If you do not see file, that mean you do not have an active license in your SiteShop.ph account.
- Plugin version is numbers at the ending of filename here below represented by x.x.x:
"7-eleven-for-woocommerce-stable-x.x.x.zip"

3 - Unzip Plugin

- Extract "7-eleven-for-woocommerce-stable-x.x.x.zip"

4 - Upload Extracted Folder

- Using FTP or SFTP, upload **extracted folder** to the **wp-content/plugins** folder in the root of your WordPress installation, see below how to find it.

Note:

- You need to allow overwrite files
- Uploading files by not using FTP or SFTP can fail with not enough values in your php.ini file server configuration for these parameters: memory_limit ; upload_max_filesize ; post_max_size ; max_execution_time

The location of the root of your WordPress installation depends on where you originally installed WordPress, and is also driven by your webhosting provider.

Common folder locations to check are:

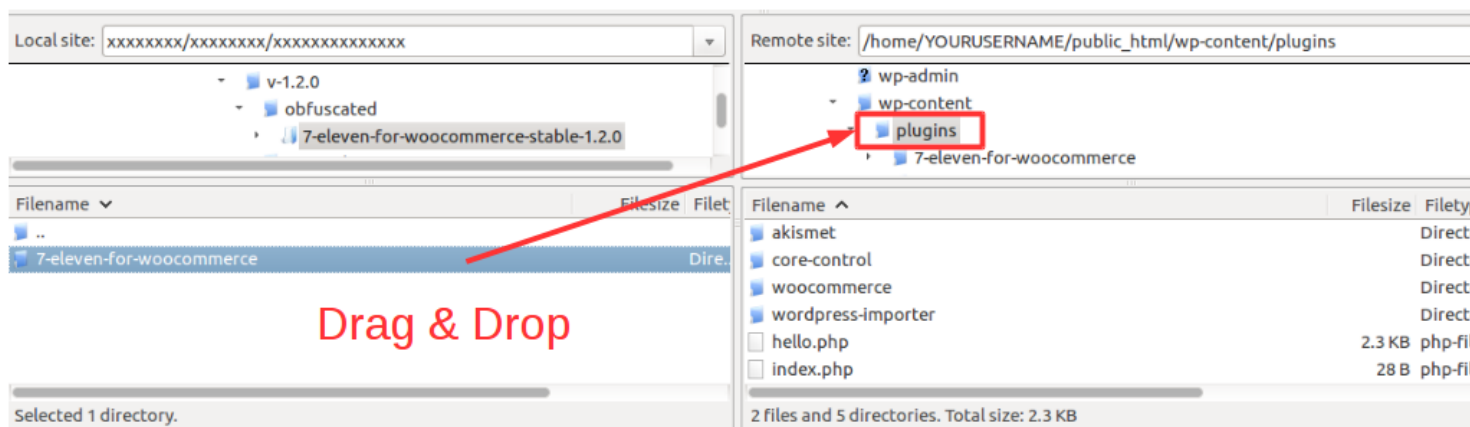

/
/public_html
/www
/var/www/
/home/YOURUSERNAME/www
/home/YOURUSERNAME/public_html
/srv/
...

You know you've found the right folder when you see the following subfolders:

wp-includes
wp-content
wp-admin

If you can't find the root of your WordPress installation, get in touch with your webhosting provider and ask them to help you locate it. In most cases, it's the same as the document root.

FTP Upload example, when the location of the root of your WordPress installation have this path:
/home/YOURUSERNAME/public_html

5 - Activate the Plugin

- Login to your WordPress Admin Panel
- Go to Plugins screen
- Check that **WooCommerce Plugin** is ever activated, if not you have to activate it first
- Find the newly uploaded Plugin **7-ELEVEN For WooCommerce** in the list
- Click **Activate** to activate the Plugin.

6 - WooCommerce | Settings | General

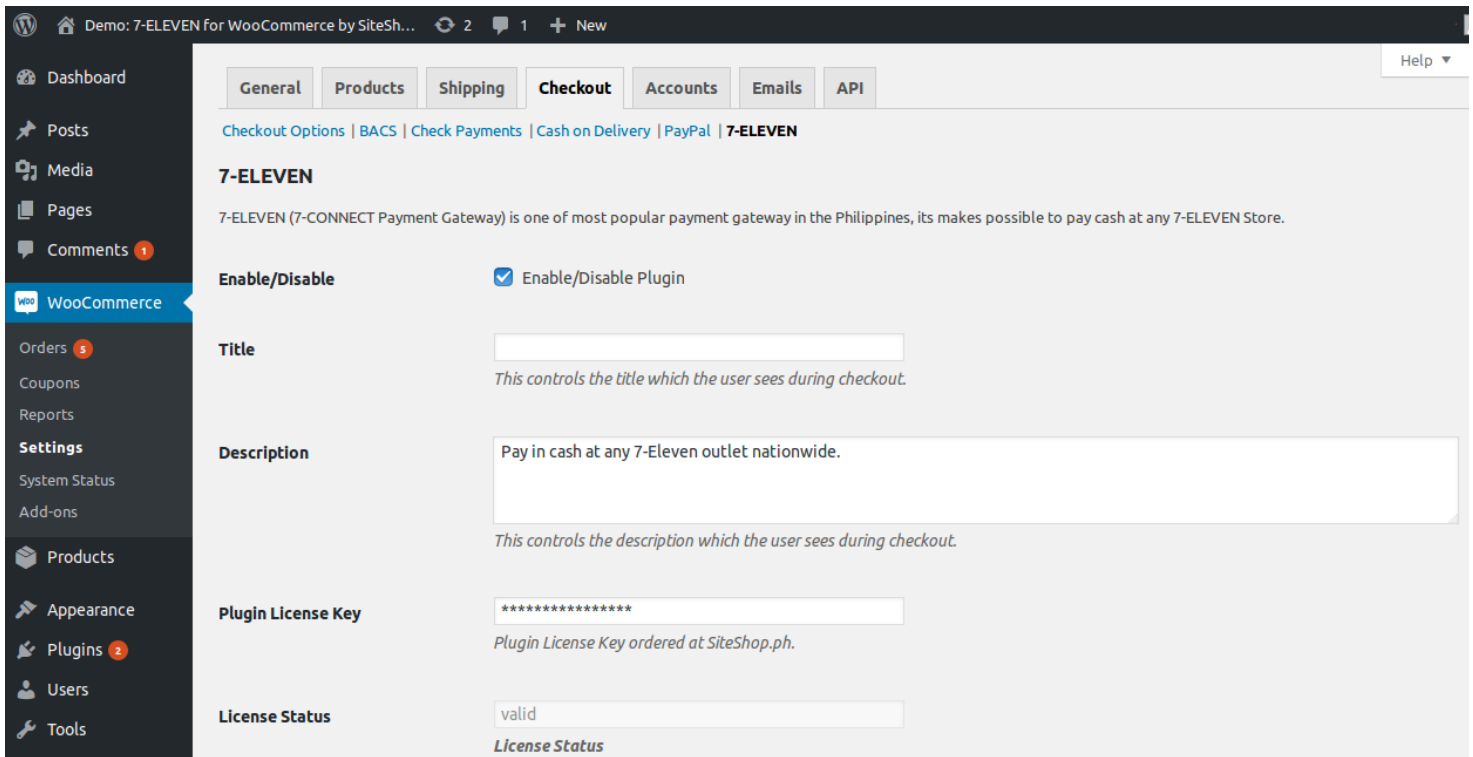

- In WordPress Admin Panel, go in WooCommerce >> Settings >> "General" Tab
- At "General Options", check that at "API", **Enable the REST API** is ticked. For very last WooCommerce version, this parameter is at "API" Tab
- At "General" Tab and "Currency Options", Check that "Currency" is set to **Philippines Pesos** as only this currency is supported by 7-ELEVEN Gateway

7 - WooCommerce | Checkout | Checkout Options

- Still in: WooCommerce >> Settings
- Go in "Checkout" Tab
- Go at bottom page & at "Gateway Display Order", you can Drag and drop gateways to control their **display order** on the frontend and tick the **default gateway** you want and **save**

8 - WooCommerce | Checkout | 7-ELEVEN

- Still in: WooCommerce >> Settings >> "Checkout" Tab
- Click on **7-ELEVEN** Link

As per the above screen you can see parameters for 7-ELEVEN Payment Plugin, we are going to explain every config parameters one by one:

- **Enable/Disable:**

This controls whether the 7-ELEVEN Gateway is enabled or not at Checkout.

- **Title:**

This controls the title which the user sees during checkout.

- **Description:**

This controls the description which the user sees during checkout.

- **Plugin License Key:**

Insert Plugin License Key ordered at SiteShop.ph

- **License Status:**

Display automatically your License Status ; After saving your above Plugin License Key, you can force a refresh by logout and Login to WordPress Admin Panel

- **7-ELEVEN Merchant ID:**

Insert 7-CONNECT Merchant ID provided by 7-ELEVEN

- **7-CONNECT Transaction Key:**

Insert 7-CONNECT Transaction Key provided by 7-ELEVEN

Note: 7-CONNECT Transaction Key could be not the same for Test Account VS Live-Production Account, both provided by 7-ELEVEN

- **Gateway Test Mode:**

Enable this if you want to use your 7-ELEVEN Test Account with no real money transaction, when disabled you will be using your 7-ELEVEN Production Account

Important:

- Please kindly refer to the 7-CONNECT "Test Plan" section that can be find close to bottom page here: <http://dev.philseven.com/#vi-appendix> (<http://dev.philseven.com/#vi-appendix>)

- Before doing real money transactions, you should always test first , so please enable Test Mode.

With Test Mode enabled, at Checkout step there will be URL redirection to 7-ELEVEN Gateway Test Website and you will be able to test plugin without real money transactions.

- **Debug Log:**

Enable this if you want Log 7-ELEVEN events, such as Transaction initiated, Web Redirection, Notification, Daily Order Status Synchronization, inside: log file

If the file do not exist, please check at WooCommerce >> System Status, if "Log Directory Writable" status is fine.

- **Daily Order Status Synchronization:**

Daily Synchronization of order status is done automatically with your 7-ELEVEN Account.

This is an additional method to on the fly order status update.

This is particularly helpful in case some notifications were not received at WooCommerce as short Internet connection interruptions are possible, and having missing update status on orders in your WooCommerce was not an option. Also because 7-CONNECT do not send notify when transaction EXPIRED, so this daily synchronization is helpful to Cancel wooCommerce order associated with a 7-CONNECT EXPIRED transaction

- **Postback URL:**

Displayed URL must be communicated to 7-CONNECT Support

9 - 7-CONNECT "Test Plan"

- **Important:**

- Please kindly refer to the 7-CONNECT "Test Plan" section that can be find close to bottom page here:
<http://dev.philseven.com/#vi-appendix> (<http://dev.philseven.com/#vi-appendix>)

- Communicate to 7-CONNECT support your Postback URL there is displayed in red color at bottom page here:
 WooCommerce >> Settings >> "Checkout" Tab >> 7-ELEVEN

10 - Grid of Cross-Reference Status

7-eleven	
Status Code	Description
PENDING	A transaction waiting to be paid
STIP	Successfully paid transaction that is still present in a queue called STIP. Every 10 minutes 7-Connect w
POSTED	Successfully paid transaction with successful posting of payment to the merchant site.
EXPIRED	Customer was not able to use the 7-Connect Reference Number during time that 7-Connect Reference

Important:

- **Auto cancellation of pending orders by WooCommerce:**

WooCommerce order status always start by a "Pending Payment" status, it's their initial status at WooCommerce.

From checkout step, customer is redirected to 7-ELEVEN website, but there if customer do not submit the 7-ELEVEN website form, order at WooCommerce will stay at the initial status.

Depending of what is your parameters at WooCommerce for inventory (Menu: WooCommerce >> Settings >> Products >> Inventory : **Hold Stock**), orders still at their WooCommerce initial status (Pending Payment) could be Cancelled automatically by WooCommerce after the time definited at "**Hold Stock**". We recommend to set it to 30 mins.

Note that according to above grid "Pending payment" order status at WooCommerce do not match to "Pending" transaction status at 7-CONNECT. The Pending transaction status at 7-ELEVEN only match to "On Hold" status at WooCommerce, a such way only orders where customers did not submit the 7-ELEVEN website form could have their order cancelled by WooCommerce depending off parameters you set at "**Hold Stock**".

- **Delivery - "Complete" order status at WooCommerce:**

The "Complete" order status at woocommerce is not managed/updated by the payment gateway plugin because it's a logistic matter, so admin can update status manually or rely on a logistics plugin that could auto update WooCommerce order to the "Complete" status.
